

September 1, 2020

Greetings Students,

Welcome to another year at Ontario Tech University. For those of you returning, welcome back! For all the first years entering into university, welcome to an exciting new journey of your life! On behalf of the Engineering Students' Society (EngSoc) Executive Council, we are excited to serve you throughout the year with different events and initiatives to get you involved with us as a member. From networking opportunities to sharing our engineering culture and traditions, we are here to enrich your skills in leadership and professional development.

Your Ontario Tech EngSoc Executive Council is group of dedicated students like you as we are giving our time outside of class as volunteers to create a positive university experience just for you. In addition to us, we also have our Ontario Tech Student Union and many clubs such as Women In Engineering, North American Young Generation In Nuclear, Engineers without Borders, Ontario Tech Racing, Robot in 3 Days, and so many more to make your year an enjoyable one. Please do not hesitate to check them out through our website, [**otengsoc.ca**](http://otengsoc.ca).

As this year is different compared to previous years due to COVID-19 (Coronavirus), I want to assure you that our team and I have been working really hard to provide you a wonderful year through virtual programming. For more information on what we are offering, please do not hesitate to go on our social media platforms or visit our website. You can also reach out me through emailing me for any inquiries.

As we enter into a new year, I wish you all the best in your education and hope that you do well throughout the year. Take care of yourself as Mental Health is important and should be your main priority to have a successful year. Stay tuned throughout the year and I hope to see you online and in-person.

Yours Truly,

Garie Kala-Ananthan
President
